WORK EXPERIENCE

Technical Designer II - Contract

Kaijon LLC / HTX Labs | Remote – Smithtown, NY | Feb 2025 – Apr 2026

- Created interactive functionality for digital twins of aircraft mechanisms for U.S. Air Force training sim, *EMPACT*, for use on VR, PC, and mobile platforms.
- Designed and got approval on pre-production docs for gameplay mechanics and interactive designs from stakeholders and subject matter experts.
- Migrated legacy training procedures from *EMPACT 2* (UE4) to *EMPACT 3* (UE5).
- Wrote technical documentation for procedures to improve QA efficiency.

Software Engineer

The Devhouse Agency | Dallas, TX | Apr 2024 – Oct 2024

- Designed and programmed player mechanics, game systems, and UI for open world/narrative game, *Hunter's Legacy*, for both FPS and VR modes. (UE5)
- Constructed gameplay flow and level design based on a script outline and a satellite scan of Katmai National Park.
- Assembled cutscene cinematics, implemented UI, and debugged gameplay elements for a Co-op party game. (Unity)

Software Engineer

ForwardXP | Dallas, TX | Aug 2021 – Jul 2023

- Designed and programmed interactions, puzzles, and sequences for *PDTA: House Broken* after researching Mixed Reality for company leadership. (UE5)
- Debugged, updated, and replaced legacy player movement, interactions, UI, and game visuals along with adding accessibility and QoL improvements for *Please, Don't Touch Anything VR* Quest version. (Unity)
- Contributed to control scheme redesign and wrote documentation on potential gameplay improvement for the *Arashi* port to modern VR consoles.
- Conceptualized, designed, and implemented party modes for *Horizon Worlds* by rapid prototyping and having regular playtests and discussions with Meta.

Software Engineer

Netsmart | Great River, NY | Nov 2020 – Aug 2021

- Programmed and debugged myAvatar Electronic Health Records in Caché.

Software Engineer Intern

BAE Systems Inc. | Greenlawn, NY | May 2019 – Aug 2019

- Developed and programmed an Android app for the Vuzix M300 Smart Glasses.

PERSONAL PROJECTS

Usurper - Created a game with a small team. Contributed to game design, UI/UX, art, marketing, video editing, and programming. 10K+ sales and a positive rating on Steam.

Game Jams - Created games with a small team each time in 2-3 days. 5 of 6 projects have been ranked in the top 1-10% in at least one category from thousands of entries. One ranked 17th in humor.
